

## Seeking assignments in Java/J2EE Senior Development of Organisation in the IT Sector

### CAREER SNAPSHOT

- ⇒ Having 9+ years of progressive experience in software development with an earned reputation for meeting deadlines and delivering critical solutions.
- ⇒ Good analytical abilities, quick grasping power zeal for learning new things.
- ⇒ Strong knowledge & Work Experience in **Java, J2EE**.
- ⇒ Good in **Spring me Work 4.0.6**
- ⇒ Good Knowledge & Strong Work Experience in **Angular Js, JavaScript**.
- ⇒ Work Experience in Web Servers **Tomcat 9.0**.
- ⇒ Work Experience in & Good knowledge in **Model View Controller Architecture**.
- ⇒ Good Knowledge & Work Experience in **MySQL 8.0**

### TECHNICAL SKILL SET:

Databases	MySQL 6.3
Programming Languages	JAVA/J2EE
Frame Works	Springs 6.0, Spring Boot Angular Js, Angular
Java Technologies	JSP 3.0, JDBC 4.0
Web Servers	Tomcat 9.0
Web Technologies	CSS3, Java Script, Angular JS
Development Tools	MyEclipse 2022-12 (4.26.0)

### SCHOLASTICS

- ⇒ **M.C.A** from Madras University with **72.3% in 2009**.
- ⇒ **B.SC Computers** from S.V University with **74.2% in 2006**.

### PERSONAL DOSSIER

- ⇒ **DOB:** 15/05/1986
- ⇒ **Gender:** Female
- ⇒ **Marital Status:** Married
- ⇒ **Languages Known:** English, Telugu, Hindi

### PROFESSIONAL EXPERIENCE

Since Dec 2016: **KANTAR(Analytics Quotient), Bangalore as Software Engineer**

#### Project 1#: BEA Dashboard

##### Client: PMI

Developing custom PMI dashboard for SFP study which consists of different modules which helps analyze different KPIs using different filters. Brand Pulse is the interactive online scorecard that gives us an easy way to track Brand Health and Brand Performance. As well as giving you a regional overview of how brands are performing, Brand Pulse has the added ability to drill down to country and city level data. The tool also provides competitive data, historical trends and key driver analysis. Brand Pulse is an online visual dashboard for performance reporting for both brand and region teams. It contains 4 modules each module based on user restriction showing data. Snap Shot, Cross Country KPI, Cross Brand KPI, Reporting. Each module contains data by based on different categories. It contains overview and Deep dive charts appearing with competitor's data and self-data.

#### Roles and Responsibilities:

- Developing new Client Requirements.
- Started writing coding using spring and angular js.
- As a Senior developer Attending meetings with the clients and domain team to get the development work.
- Doing Unit Testing on new developed code
- Once coding and development is complete handling deployments for Development environment and production environment.
- Fixing Production Defects.
- Files check in to SVN.
- Implementing coding to handle Microservices.
- Helping to team member in coding issues.

- Handled Database Upload and manage data.

**Environment** JSP 2.1 , JDBC 4.0,mysql ,Eclipse 4.6,Css,D3.js, Spring Boot, Maven ,Angular Js, JavaScript.

### **Project 2#: BrandPulse**

**Client: IHG**

It is Custom Dash Board to interact online scorecard that gives us an easy way to track Brand Health and Brand Performance. As well as giving you a regional overview of how brands are performing, Brand Pulse has the added ability to drill down to country and city level data. The tool also provides competitive data, historical trends and key driver analysis. Brand Pulse is an online visual dashboard for performance reporting for both brand and region teams. It contains 4 modules each module based on user restriction showing data. Snap Shot, Cross Country KPI, Cross Brand KPI, Reporting. Each module contains data by based on different categories. It contains overview and Deep dive charts appearing with competitor's data and self-data.

#### **Roles and Responsibilities:**

- Developing new Client Requirements.
- Started writing coding using spring Boot and angular js.
- As a developer Attending meetings with the clients and domain team to get the development work.
- Doing Unit Testing on new developed code
- Once coding and development is complete handling deployments for Development environment and production environment.
- Fixing Production Defects.
- Files check in to SVN.
- Implementing coding to handle Microservices.
- Helping to team member in coding issues.
- Handled Database Upload and manage data.
