- Capabilities in policy designing, project management, budgetary control, vendor negotiations, procurement, program development and facility expansion.
- A high energetic leader known for capability to create successful outcomes in complex multi-cultural environment.

Key Skills & Area of Interest

- Project Management
- Knowledge of Different types of Project Management tools like ZOHO, JIRA, and ASANA.
- Team Management
- Client Relationship Management
- Project Delivery & Management
- Operations Management
- Project Implementation
- Server Monitoring, Maintenance and Support.
- Knowledge on SQL Server, database maintenance, ERP.
- Networking
- Hospital Administration
- Liaison & Coordination
- Project Maintenance Service & Support
- Software Testing/ Quality Assurance

- Capabilities in policy designing, project management, budgetary control, vendor negotiations, procurement, program development and facility expansion.
- Requirement Gathering along with Reporting & Documentation.

Projects & Work Experience

Projects and Organizations:

Project Management In Intellistride:

Worked as Project Manager-IoT in Intellistride.

IntelliStride is a provider of RFID products, IoT software and solutions in the Asia Pacific region in partnership with Kathrein Solutions GMBH, a worldwide leader in RFID Antenna technology.

Duration: I Joined Intellistride India Pvt. Ltd. in March – 2020 and Currently working.

Heading Three Major Clients as Project Manager

1. **Maruti** – Maruti is our prestigious client Where we have been Provided the IoT Solution (**Automatic Vehicle Tracking System - AVTS**) for **Service Centre Automation**
2. **MG** –In MG Automobile we have been provided the IoT/RFID Solution to Automated its Service Centres **Vehicle Identification System – VIS** is RFID integrated solution.
3. **Decathlon** – Decathlon is Our Major client in Retail, where we have been Provided Various IoT/RFID Solutions I headed 2 Projects there 1. Security Gate Solution 2. Point of Sale – RFID Integrated POS Solution.

Major Responsibilities Serving

- Project Control
- Project Planning
- Project budget
- Project Life cycle
- Customer Management engagement process.
- Creating IoT solutions.
- IoT platforms and software integration.
- Creating an inspiring team environment with an open communication culture.
- Set clear team goals.
- Delegate tasks and set deadlines.
- Oversee day-to-day operation.
- Monitor team performance and report on metrics.
- Motivate team members & make them achieve targets.
- Discover training needs and provide coaching.
- Team members' feedback and resolve any issues or conflicts.
- Recognize high performance and reward accomplishments.
- Encourage creativity and risk-taking.

Project Management In Viz-Experts:

3D Immersive VR CAVE-Tech:

The Project 3D IMMERSIVE VR CAVE-TECH Completed along with Installation, Integration and Training at Indian Institute of Technology Hyderabad

Whereas IITH has undertaken the Project called 'IIT Hyderabad-Japan Collaboration' under the broader Indo-Japan Collaboration of the Government of India for implementation.

The VR presentation and Visualization wall interfacing, and display software shall support cluster visualization using a Graphics Server enabling the real time image generation of interactive 3D simulations in stereoscopic 3D on four (4) projectors in real time image synchronization, creating one large immersive display.

The virtual reality system allows the users to display training content in 3D with high-definition stereopsis with integrated head tracking with full motion parallax and precision interactive stylus.

The 3D Stereo Eyewear & Emitters, AV Equipment, and Wireless Motion Tracking System is compatible with the 4-Screen 3D Stereo immersive Projection System and Wall interfacing and Display software as a turn-key solution.

Duration: I worked at Viz Experts India Pvt. Ltd. from February – 2019 to March - 2020.

Roles and Responsibilities:

I headed this Project as Project Manager

- Deliver projects and products using the appropriate agile project management methodology, learning & iterating frequently.
- Work to define the roadmap for the given product and translate this into user stories.
- Lead the collaborative, dynamic planning process – prioritising the work that needs to be done against the capacity and capability of the team.
- Matrix-managing a multidisciplinary team.
- Ensure all products are built to an appropriate level of quality.
- Planning & Defining Scope and Activity Planning and Sequencing
- Resource Planning with Developing Schedules & Time Estimating
- Scalability, Interoperability and Portability Analysis.
- Monitoring and Reporting Progress accordingly.

Poseidon Program Database Effort for India:

The database modelling effort would be divided between the VizExperts and Pixelloid teams. At a high Level the VizExperts team would handle the GIS, photogrammetry, city modelling, sensor and Radar simulation database modelling effort through material classification while the Pixelloid Team would handle asset-moving models modelling, texturing and the modelling of the airfield Area and its vicinity in a higher level of detail.

Roles and Responsibilities:

I headed this Project as Project Manager

- Deliver projects and products using the appropriate agile project management methodology, learning & iterating frequently.
- Work to define the roadmap for the given product and translate this into user stories.
- Lead the collaborative, dynamic planning process – prioritising the work that needs to be done against the capacity and capability of the team.
- Matrix-managing a multidisciplinary team.

- Planning & Defining Scope and Activity Planning and Sequencing.
- Resource Planning with Developing Schedules & Time Estimating.
- Scalability, Interoperability and Portability Analysis.

Amrita Healthcare Informatics Suite - AHIS:

CCHIT Certified Multi-Modular Integrated Healthcare Network Information System- Amrita Healthcare Informatics Suite.

Amrita HIS is a J2EE based product suite, built on services-oriented architecture, that provides a seamless, integrated, one stop solution for the healthcare industry. The product suite leads in scalability and performance, while at the same allowing flexible configurations through its rule-based workflows.

The modular design allows for easy installation and maintenance and the n-tier architecture provides a platform that is scalable, reliable, low cost and user-friendly. This not only helps in daily patient relationship management (PRM), but also provides the foundation to foster research and development in bio-medical and biotechnology, enabled by availability of Electronic Medical Records (EMR).

Amrita HIS has been built on Open-Source technologies and is SAAS (Software as a Service) enabled. Amrita HIS is a complete, end-to-end integrated solution.

Duration: 4 Years exp. from Jan - 2015 to Jan-2019 I am worked for Amrita Technologies.

Roles and Responsibilities:

Hospital Administration, Operations Management and General Administration

- Formulating long/short-term plans to enhance operations and ensuring proper implementation of policies towards promoting & protecting health & organizational effectiveness.
- Developing budgets for managing facilities and interfacing with senior management and Heads of Department for implementing administrative policies & procedures
- Administering a large staff of doctors and managing the operations including Personnel, HR, PR and developing standards of patient care / services and facilities
- Scheduling day-to-day activities of groups of employees in specialized units within the hospital infrastructure
- Managing entire departments in the hospital and serving in high-level roles pertaining to operations and special functions over the entire hospital
- Planning the preparation of timely and accurate financial and qualitative reports on a weekly or monthly basis and as and when required
- Building and sustaining a strong working relationship with the Business Development & Operational Teams, help wherever and whenever required.
- Ensuring compliance with statutory acts as well as rules & regulations
- Executing all kind of operational logistics such as equipment, movement, and replenishment
- Supervising the operation services and managing maintenance of hospital building & components, including interior utilities & equipment
- Providing high quality services by extensive interaction with patients and quick resolution of problems; managing all aspects of service management

Highlights: (segregate organization wise)

- Installing the server application and maintaining for any issue
- Installation of Build on the Live & UAT server.
- Installation of License on Live & UAT server.
- Monitoring Live & UAT servers (Web server, Application server, DB server).
- Making live servers up and down and trouble shooting.
- Providing DB dump to the development team as per their requirement.

- Performed administrative duties in hospital departmental and service management areas with only general supervision from the Hospital Administrator.
- Recognized for successfully implementation of Amrita HIS in various location in India by the Project Director
- Developed and implemented daily “huddles” to enhance “real time” communication with staff.
- Worked as a liaison between clients and hospital staff.
- Managed duties of Hospital Administration including department oversight and functioning as the hospital administrator-on-call.

TCS-iON Digital Exams Solution:

TCS - iON Digital Exams Solution digitizes and automates end-to-end examination processes.

Worked in TCS SMB project in which TCS conduct the online examinations like GATE, AIEEE, CWE for Banking Exam (IBPS), and Govt. sector exams. In this profile, we manage technical as well as various management issues. The iON Digital Assessment Solution to conduct large scale assessments digitally, shortening the exam cycle.

Roles and Responsibilities:

The iON Digital Assessment Solution provides end-to-end services to configure and schedule examinations. This include creating online and offline assessments, configuring attendance and hall tickets, creating drives, managing exam slots, and managing the test centres.

- Front end with TCS iON clients on issues concerning Assessment Content.
- TCS Server management, Network solution and Troubleshooting during exam.
- Testing and Verification of the nodes and servers.
- Coordination with college work force and Management of the exam centre.
- Assessment as a Centre Head and IT-Manager.

TCS-iON OSM - On Screen Marking:

The iON Digital Marking Solution combines the accuracy of technology with the expertise of professional evaluators to improve the efficiency and speed of the subjective answer script evaluation process.

The iON solution digitizes the entire evaluation process, which includes collecting, transporting, digitizing, evaluating answer scripts, as well as publishing results. This includes scanning answer scripts, uploading answer scripts and question papers along with relevant marking scheme / guidelines to evaluators as well as assigning user IDs passwords to evaluators. In addition, it helps in reviewing or re-assigning evaluated scripts in case of discrepancies and tracking the status of pending evaluation through command centre functionality.

Duration: 1 Year exp. from Dec - 2013 to Nov – 2014.

SECC Socio-Economic Caste Census:

The Ministry of Rural Development Government of India commenced the Socio Economic and Caste Census (SECC) 2011 through a comprehensive door-to-door enumeration across the country. This is the first time such a comprehensive exercise has been carried out for both rural and urban India. It is also expected to generate information on many social and economic indicators relating to households across the country.
