Defect Tracking Tools	:	<b>JIRA, Mantis</b>
Database	:	<b>SQL Server 2019</b>
Agile	:	<b>Scrum</b>

## **ACADEMIC RECORDS**

- BA with math from M.D.U in 2018.
- Intermediate from CBSE Board 2015.
- High school from CBSE Board 2013.

## EMPLOYMENT

**Empirical Solutions**, Noida Since March 2020 Till Date

## PROJECTS

**Project Name** : **e-Bill**  
**Plateforme** : **Web and Mobile**  
**Technology** : **Manual Testing, SQL**

### Description:

e-Bill is a complete solution for managing Invoice and Billing operations. e-Bill helps business owners right from raising an invoice to recording payment for the invoice and then finally providing a receipt all from one app.

Using Simple e-Bill, business owners can also record purchases and keep track of inventory. Further business owners can record and track Sales Orders Received as pending or fulfilled. The App will also help business owners generate profit and Loss reports

Generating invoice is simple and fast and business owners can create and send invoices immediately, track overdue invoices and make sure to get paid for customers' invoice on time.

**Role: Test Engineer**

### Responsibilities:

- Understanding Business requirements
- Involved in writing test cases for the requirements.
- Test Case execution, reporting bugs using **JIRA**
- Involved in smoke testing, functional testing and regression testing.
- Sanity Testing on Production environment
- Make sure all reported defects are fixed prior to demonstration
- **GUI Functional Testing on web and Mobile.**
- **API Testing -Using Postman**
- Database Validation - mapping between UI and tables' column
- Responsive testing, compatibility testing (web and mobile browser)
- Used Excel sheets for Test cases preparation, Test Execution and Test Report preparation.
- Test report generation

**Project Name** : **Human Resource Management**  
**Environnement** : **Java**  
**Technology** : **Manual Testing, SQL**

**Description:**

HRMS enables users to efficiently organize, populate, and maintain information on all aspects of their organization employees. HRMS also allow user to fully automate the hiring process cycle from manpower requisition to short listing candidate, to interview assessments, to job offering, to salary structure.

HRMS allow organization to reduce the hiring cost and manage full hiring cycle on one location

**Role: Test Engineer****Responsibilities:**

- Understanding Business requirements
- Involved in writing test cases for the requirements.
- Involved in smoke testing, functional testing and regression testing.
