- Worked as an ADF Developer on a project called Kirloskar Oil and They specialize in the manufacturing of air-cooled and liquid-cooled diesel engines. Mainly Kirloskar manufacture a variety of agri-engines and diesel-engine pump sets that have over generations and continue to serve the irrigation needs of farmers.
- We are adding and importing bulk invoices of air cooled, agri-engines and diesel-engines data into database by uploading spreadsheet uploads through ADF applications then only end user will be able to see and verify the invoices data in adf application.
- As a Developer enhancement in the existing code according to the client requirements.
- Interact with the business users to identify the key proportions and actions for business performance.
- Implemented User Interfaces using ADF framework components.
- Involved in developing the pages.
- Implementing user interface components using JSF and Oracle ADF.
- Worked on Search page, Create page by using LOV's, Insert, Update and Delete. Oracle DBCS in ADF page.
- Extending of ADF page.
- Created advanced tables and regions in ADF Framework.
- Calling stored procedure to ADF.

**Project 3 #**

Client	CRS Own Cloud Project(Internal Project)
Project type	Oracle Applications
Period	June 2018 to Sep 2022
Environment	Oracle ERP, JCS-SX, OIC and VBCS
Role	Oracle Sr.ADF Developer/Cloud Integration Developer
Client Description	Insight of America, Ltd. is the a owned,US company that has been producing the world's most popular Cloud integration.

**Responsibilities:**

- Involved in requirement and supporting on all test cycles like SIT1,SIT2,SIT3 and UAT phase and supporting to Finance payroll managers for different non Prod and Prod instances.
- Involved in ADF screen development.
- Experience in Oracle Integrations with SaaS applications for VBCS Screens based requirement.
- Expertise in FBDI on Oracle ERP.
- I have Extensive knowledge on Process Cloud Service (PCS).
- I have Involved in VBCS applications development and supporting on VBCS and also integrated same VBCS applications into the ERP.
- Around 5 years of Experience as Oracle Fusion Functional and technical Consultant in SaaS and PaaS implementations with BI Reports.
- I have supported on ADF and VBCS based applications (PaaS based access and Country wise access) for 180 countries.
- I have experienced on to Import bulk recurring transactions data into Project costing in ERP by using VBCS and ADF based applications (Third party applications) and OIC integrations (ERP Cloud Adapter).
- Experience in developing and Testing OIC code using technology adapters (Oracle Applications, ATP Adapter, REST Adapter, SOAP Adapter, File Adapter , FTP Adapter and ERP Cloud Adapter), Fault Handling (Global Fault Level and Scope Level).
- Experience in importing AP Invoices bulk data by using FBDI.
- Experience in creating AP invoices by using REST API in POSTMAN.
- Expertise in BIP, FBDI on Oracle ERP and Developing the Integrations on OIC as Per the Integration Design Architecture and Testing.
- Understanding the Functional Requirements & Design Specifications.
- Developing the Integrations on OIC as Per the Integration Design Architecture and Testing.
- I have used OIC design activities like STAGE, STAGE FILE, SWITCH, FOR EACH, WHILE LOOP etc.
- I have involved in unit testing of OIC integrations and VBCS applications and migrating into different instances.

- I have worked on Oracle cloud implementation project using OIC.
- I have worked in multiple cloud adapters like ERP CLOUD, ATP Adapter.
- I have used different integration patterns like APP DRIVEN and SCHEDULE ORCHESTRATION and Mapping the data.
- I have used the OIC design activities like STAGE, STAGE FILE, SWITCH, FOR EACH, WHILE LOOP, EMAIL...etc.
- I have involved in unit testing and supporting in all environments like Dev1, Dev2, Test, SIT1, UAT and PROD to support 180 countries and delivered the services on time.
- Good understanding of Action and Action chains – VBCS
- Good understanding of pageflow , page life cycle and page navigation
- Strong experience accessing data through REST API's.
- prepared test scenarios for UAT.
- Prepared Documentation and trained end users.
- Integration of oracle ADF with Oracle ERP using PaaS(JCS-SX) environment.
- Monthly Maintaining PaaS environment and monitoring monthly wise scheduled jobs.
- years of Experience as Oracle Fusion Functional and technical Consultant in SaaS and PaaS implementation with BI Reports.
- Experience in Oracle Integrations with SaaS applications for VBCS Screens based requirement.
- Good experience in Oracle cloud SaaS and PaaS.
- SaaS - BI Publisher and ADF Sandbox Management.
- PaaS – DBCS and ATP Offerings.
- Deployed custom VBCS pages into Oracle Cloud.
- Calling Oracle API REST Services by using Dell-Boomi integration in ERP applications.
- I have Created BIP reports to fetch the ERP data like Projects, tasks, lookups, HCM data, PPM data, OTL data, Data sources either OTL or File based countries.
- Integrating ADF applications into Oracle SaaS ERP.
- Implemented User Interfaces using ADF framework and Prime Faces components.
- Implementing user interface components using JSF and Oracle ADF.
- Do enhancements according to the client requirements.
- Interact with the business user to identify the key proportions and actions for business performance.
- Able to Develop Custom User Interface Component Development.
- Worked closely with end users and Business Analysts in pre-implementation stage (Requirement gathering and analysis).
- Implemented User Interfaces using ADF framework.
- Worked on Search page, Create page by using LOV's, Insert, Update and Delete.
- Extending of ADF pages.
- Created Adf related custom scheduler applications , advanced tables and regions in ADF Framework.
