## PROJECTS

### Project #1

**Project Name:** Abbott

**Description:** This is a mobile website that will enable the customer registrations and facilitate profile enrichment for registered customers of the brand, where the customers will be able to earn points by scanning any of ABBOTT products and redeem the rewards by using the earned points.

**Responsibilities:** As a team member, I developed the user interface for a single-page application using React JS and Redux. I also implemented responsive design principles to ensure that the application was optimized for desktop, tablet, and mobile users. My work with React JS played a crucial role in creating a seamless and engaging user experience.

**Development Environment:** HTML, CSS, JavaScript, React JS, Redux, Bootstrap and Restful API.

### Project #2

**Project Name:** Pertamina

**Description:** At Pertamina, we are committed to offering our customers high-quality, affordable in-home fitness products. We strive to motivate and educate people about the importance of health, fitness, and being physically fit through the development of tested and effective products. In addition, we offer a range of fitness accessories and nutritional supplements to support our customers in achieving their health and fitness goals.

**Responsibilities:** As a team member, I developed the user interface for a single-page application using React JS and Redux. I also implemented responsive design principles to ensure that the application was optimized for desktop, tablet, and mobile users. My work with React JS played a crucial role in creating a seamless and engaging user experience.

**Development Environment:** HTML, CSS, JavaScript, React JS, Redux, Bootstrap and Restful API.
