Offering **over 17 years** of extensive experience in spearheading several implementation projects as Solution Architect, Techno-functional Consultant, Onsite Coordinator, Project Manager and Software Engineer; targeting challenging assignments with an organization of repute

II Profile Summary

|||||||

- Proficiency in advanced **SAP practice – S4/HANA, SD, MM, CS, GTS, SCM, EWM, TM, CRM, Fiori, ABAP on HANA, Simple Logistics, Ariba, IBP, SAP Cloud platform, ECC and HANA** and knowledge of business process analysis, technical design and reengineering
- Excellence in **Solutioning** and **managing SAP ERP digital transformation projects** with large teams right from requirements through quality assurance, documentation, implementation and maintenance
- Experience in executing full lifecycle development projects; ramped up projects within time, budget & quality parameters, as per project management & best practice guidelines such as Agile and SAP Activate methodology
- Interpret client requirements, business processes, and use cases to produce quality technical designs in the implementation, enhancement and support, integration techniques, extensions or enhancements to the platform
- Experience in SAP ECC SD, S/4 Hana SD, CRM, SCM, MM, Fiori, PS, SAP Ariba – Upstream and Downstream P2P modules like Spend visibility, Contract life cycle, Strategic sourcing, Supplier lifecycle, Catalog Management, and Invoice Pro
- Deliver ERP transformation plan from on-prem to cloud S4 HANA solution, outlining transition states, integration and data architecture encompassing cloud migration plan for complex multi-vendor platforms.
- Provide S4 HANA technical directions, best practices, and align ERP solution proposal with AC approved architecture patterns while defining end to end S4 HANA solution offering including integration, data flow, network, deployment, and process diagrams. Guide ERP transformation project towards AC architecture data and security compliancy
- Integrate S/4 HANA with other SAP systems and external systems
- Providing subject matter expertise in Source to Pay Processes utilizing SAP Ariba
- Excellence in SAP Ariba Procurement capabilities including Ariba Buying and Invoicing, Ariba Guided Buying, Ariba Catalog and Ariba Invoice Management
- Strong experience in SAP Ariba implementation consulting. Pre and post implementation experience of delivery of Ariba on - demand products preferably together with integration to SAP ERP products
- Experience in SAP development practices, Project delivery, Agile practices and DevOps
- Experienced working on **SAP Cloud platform/BTP** services for extensions, integrations and for developing new components using cloud foundry, kyma
- Experience in implementing commerce automation and PO flow to Ariba Network
- Developing and maintaining templates, rules, style sheets, workflows, data extractions and imports, interfaces, and object models
- Performing complex **Integrations using CPI** with various other systems connected to ECC and S/4 HANA
- Experience in programming **ABAP for RICEWs** (Reports, Interfaces, Customizations, Extensions and Workflows) in ECC and in S/4 HANA
- Experience in developing customizations, programs, scripts and reports using **ABAP On HANA, CDS, OData and Fiori**
- Excellent client-facing skills along with prior demonstrated experience of leading teams at various stages
- Understanding key procurement processes including: Purchase to Pay, Supplier Information Management, Source to Contract
- Strong Debugging Skills and ability to communicate with business on the Functional issues
- Experience with business requirements, technical analysis and design, coding, testing, and implementation of customization within software environment
- Working in capacity planning, Project Management, Customer Relationship Management, Delivery, Vendor Management, Proposal creation- RFPs, POCs, and supporting pre-sales activities

II Core Competencies

|||||||

SAP S4/HANA & FIORI
SAP SD /MM/SCM / TM/ APO/ CRM
CPI
OTC & P2P
ABAP ON HANA
SAP Ariba

SAP Cloud Platform/BTP
AWS & DevOps
Solution Architecting
Technical Solution Design
Client Engagement and
Delivery Management
ERP Data Migration

Spring framework and Java
Systems Integration
Cross-functional Coordination
Team Management
Stake holder management

II Notable Accomplishments across the Career

|||||||

- Led dev and testing teams as a **Solution Architect/ Project Manager** in SAP product implementations – S/4 HANA, SD, SCM, EWM, CRM, SAP Cloud platform, ECC, HANA, ABAP on HANA, Ariba, BTP, CPI
- Successfully implemented **S4/HANA & Fiori** new implementations, conversion, and Transformation projects
- Successfully implemented various ECC modules, ABAP and ABAP on HANA programs, and HANA implementations
- Successfully implemented apps and integrations and apps on **SAP BTP** platform – node, java, ABAP on HANA
- Experience in using **ABAP and ABAP on HANA for RICEWs** (Reports, Interfaces, Customizations, Extensions and Workflows) in ECC and in S/4 HANA
- Successfully implemented **SAP Ariba cloud** stack solutions for various clients
- Data migration, integration with AWS services

II Work Experience

Since Nov' 22 to Feb 23 "RafterOne", Bangalore, Development Manager
(Worked for in US, Canada Europe, **Development manager** and **Solution Architect**)

Client: Ferguson enterprises

Key Result Areas:

- Planning, executing and **managing & delivering S/4 HANA SD, EWM, SCM, Fiori, BTP projects** in tune with the core business objectives; implementing project plans within pre-set budgets
- **Solution architecting, Business Analysis and product ownership:** Analyse and Interpret client requirements (As is, To be, Gap), business processes optimization, and use case and tech spec design for product implementation, enhancement and support, and helping clients in implementing multi-channel and omnichannel commerce
- **Liaising with project stakeholders**, collecting requirements through workshops for B2B and B2C merchants and translating them into system requirement specification documents, technical requirements and getting consensus and approvals
- Experience in gathering business requirements, providing conceptual and detailed designs to meet business needs, performing necessary SAP configurations, writing detail specifications for development of custom programs, testing, co-ordination of transports to production and post go live support.
- Experience in Order to Cash scenarios, SAP Pricing (SD), Revenue Account Determination, Master Data (Materials, Condition records, Customer Master),
- Developed and enhanced UI functionalities using Fiori
- Implemented **Integrations** between eCommerce, SD, MM, EWM, and POS systems.
- Developing new interfaces and components on SAP Cloud platform services or BTP – APIs, Java, Fiori, Node
- Experience in designing and developing SAP BTP CAP services using Node.js, SAP FIORI applications, Workflows, Business Rules, Process Visibility etc
- Experience in designing EDI/IDOC, interfaces, Output Determination.
- Data integration and integration with AWS services

Since Jul' 21 to Nov 22 with "Levi Strauss & CO (Levi's)", Bangalore, Lead Analyst – eCommerce Operations
(Worked in different markets in Europe, APAC - AUS, NZ, JP, SK, IND as **Solution Architect/Functional Consultant/Techno-functional/Delivery manager**)

Client: Levi Strauss & Co

Key Result Areas:

- Solutioning, Planning, executing and **managing & delivering S/4 HANA SD, IS Retail, MM, ABAP on HANA, SCM, EWM, GTS, CRM, FIORI, Ariba, IBP, BTP projects** in tune with the core business objectives; implementing project plans within pre-set budgets
- **Solution architecting, Business Analysis and product ownership:** Analyse and Interpret client requirements (As is, To be, Gap), business processes optimization, and use case and tech spec design for product implementation, enhancement and support, and helping clients in implementing multi-channel and omnichannel commerce
- **Liaising with project stakeholders**, collecting requirements through workshops for B2B and B2C merchants and translating them into system requirement specification documents, technical requirements and getting consensus and approvals
- Experience in gathering business requirements, providing conceptual and detailed designs to meet business needs, performing necessary SAP configurations, writing detail specifications for development of custom programs, testing, co-ordination of transports to production and post go live support.

- Configuring in Order to Cash scenarios, Pricing, Assortment Management, Category Management, , Revenue Account Determination, Master Data (Materials, Condition records, Customer Master), Store Replenishment Planning and Distribution Centre Requirements planning, Merchandise distribution, Allocation process and Management, Distribution center and Store Physical Inventory process.
- Developed and enhanced UI functionalities using Fiori
- Experience in designing EDI/IDOC, interfaces, Output Determination.
- Implemented Integrations between SD, CRM, FI, eCommerce, BW, and POS systems.
- Functional and technical knowledge of SAP tools, systems and processes (SAP Global Trade Services, Sales & Distribution including supply chain etc.,)
- Strong experience in SAP SD, Global Trade Services (GTS) and Sales & Distribution with large global enterprises, spanning implementation of one or more core SD modules including Master data, Order capture, Pricing, Supply Chain & Logistics, Billing & Foreign Trade
- Migrating from ECC systems to S/4 HANA cloud, and performing data migration using LTMC, LTMOM
- Developing customizations, programs, scripts and reports using **ABAP On HANA, CDS, OData and Fiori**
- Developing new interfaces and components on SAP Cloud platform services or BTP – APIs, Java, Fiori, Node.js
- Experience in defining/implementing worldwide solutions across multiple legal entities in a highly complex systems and project environment) including hands-on design and configuration
- Strong experience in GTS Compliance Management Capabilities such as Sanctioned Party List screening, License determination, Customs Management processes, US Automated Export System, European Union Intrastat exporting processes etc.,
- Strong business process knowledge and ability to map business requirements to standard SAP processes
- Experience with SAP implementation methodologies and modern software development methodologies
- Design, customize, configure and testing of SD and GTS modules of SAP
- Ability to work with international team environment.
- Experience in integrating SAP S/4HANA, SAP ECC or any third party ERP and CRM systems
- Performing **SAP Ariba** Commerce Automation, Payables and Supply Chain Collaboration using the Ariba Network
- Automating master data jobs to frequently get master data from ECC to Ariba
- Managed project using project management frameworks such as SAP Activate methodology and Agile

Since Jul'13 with Crimson Logic, Bangalore as Lead Software Engineer – 2 (Sr Lead)
(Client: Multiple clients in Digital engagement practice)

Chevron lubricants: Implementing SAP Ariba upstream and downstream solutions. Maintaining product and handling production issues

Technology Environment: SAP SD, MM, CS, EWM, OTC, CRM, PS, SCM, Ariba, SAP Cloud platform, P2P, Spend, SAP Ariba buying & Invoicing, Ariba Contract Management, Ariba Sourcing, Ariba Procurement content (APC), Contract/Sourcing, SIPM, Ariba Pay, Ariba Discounting solution to North America Region, CGI, S/4 HANA, ECC MM, Fiori, ABAP

Key Result Areas:

- Planning, executing, and **managing & delivering SAP implementation solutions such as S/4 HANA SD, MM. CS, GTS, EWM, SCM APO, F&R, EM, SNC, IBP, CRM, TM Logistics, Ariba, BTP** in tune with the core business objectives; implementing project plans within pre-set budgets
- **Solution architecting and product ownership:** Interpret client requirements, business processes, and use cases to produce quality technical designs in the implementation, enhancement and support, integration techniques, extensions or enhancements to the platform
- **Liaising with project stakeholders,** collecting requirements through workshops and translating them into system requirement specification documents, technical requirements and getting consensus and approvals
- Understanding client requirements, provide solutions, functional specifications and configure the system accordingly.
- Creating presentation/workshop material for Blueprint that need to be conveyed and be able to present them to the client.
- Mapping user requirements, Solutioning, Designing, customizing, configuring and testing of S/4 HANA SD, TM, EWM, SCM, APO, F&R, Logistics and MM
- Migrating from ECC systems to S/4 HANA and data migration using LTMC, LTMOM
- Developing customizations, programs, scripts and reports using **ABAP On HANA, CDS, AMDP, OData and Fiori**
- Configuring Material Master, Purchase Requisition (PR), Request for quotation, Purchase Order (PO), Agreements, Info records, Release Procedures, Pricing, Automatic Account determination, Inventory Management, reservation, Transfer Posting, Stock Transfer and Physical Inventory process, valuation and batch management, split valuation, batch management.

- Implementing for modes of transport Road, Rail, Ocean and Air and well versed with Freight Management, Order Management, Transportation Planning, Transportation execution, Freight Cost & Settlement,
- Integration knowledge of TM with Logistic Business Network freight collaboration
- Developing WRICEF objects using Core ABAP, OO ABAP, ALV, Smart Forms or Adobe Forms, BDCs, BAPIs, Reports, Module pool Programming, Enhancement Frameworks like BADI or User exits, Workflows, Interfaces, Standard SAP code debugging, ABAP Proxies, Transport Requests, 3rd party integration approaches with SAP
- Designing Fiori apps.
- Performing SAP Ariba implementation activities such as Requirement gathering, fit-gap analysis, system configuration & customization, cutover, Go-live, etc
- Providing **subject matter expertise** in Source to Pay Processes utilizing SAP Ariba
- Performing solutioning, design, build, testing, data migration and cutover of SAP implementations, and troubleshooting and support
- Developing and maintaining global templates, rules, style sheets, workflows, data extractions and imports, interfaces, and object models
- Performing complex **Integrations using cloud integrated gateway (CGI)** with various other systems connected to ECC and S/4 HANA
- Implementing **S4/HANA** new implementations, conversion, and Transformation projects
- Developing new interfaces and components on SAP Cloud platform services or BTP – APIs, Java, Fiori, Node
- Data integration and integration with AWS services
- Performing **SAP Ariba** Commerce Automation, Payables and Supply Chain Collaboration using the Ariba Network
- Automating master data jobs to frequently get master data from ECC to Ariba
- Performing Defect analysis and issue resolution of support incidents resolution
- Performing template Configuration- Sourcing/Contract, Workflow, Supplier registration and Tax Table Set up
- Performing Ariba procurement and invoice management: master data and transactional integration with SAP, requisition and invoice reconciliation, approval workflows, SAP configurations, batch job scheduling
- Communicating with business stakeholders on the functional issues
- Reviewing designs, configurations, code, reports and deliverables
- Administering operations related to SAP Ariba Downstream and upstream implementation projects and integrations
- Apart from solutioning, performing activities such as
 - Testing Ariba stack applications, testing prototypes & handover to Operational Teams
 - Task allocation to the team, **status reporting to all stakeholders**, deliverable, **conflict resolution, people management**
- Prioritizing tasks and manage time efficiently to ensure **timely deliverables**
- Working in capacity planning, Project Management, Customer Relationship Management, Delivery, Vendor Management, Proposal creation- RFPs, and pre-sales activities as well

II Previous Work Experience

Jan'12 to Nov'12 with Polaris, as Project Manager
(Worked in SAP – SD, SCM, ABAP)

Mar'08 to Dec'11 with InterGlobe Technologies, as Sr. Software Test Engineer
(Worked in SAP – ABAP, CRM, SD, SCM, BW)

Aug'04 to Feb'08 with HCL Technologies, as Lead Engineer
(Worked in SAP – ABAP, SD, CRM, SCM)

Dec'03 to Aug'04 with Birlasoft Limited, as Software Engineer
(Worked in SAP – ABAP, SD, CRM, SCM)

II Education

- **M.Sc. (Computer Science)** from Andhra University, Location in 2001
- **B.Sc. (Computer Science & Mathematics)** from Nagarjuna University, Location in 1999

II Certifications

- **PMP** certification from PMI form Jul 2013
- **PGP - BABI** from **Great Lakes Institute of Management**, Chennai, Sep 2016 [A one year management program with a specialization in Business Analytics]

II IT Skills

Application Software:	S/4 HANA, SAP SD, CRM, SCM, Ariba, MM, HANA, CGI, SAP Cloud platform/BTP
Programming Languages:	ABAP on HANA, OData, Fiori, Java/J2EE, HTML, CSS, jQuery, Node.js, Java script
Database:	HANA, Oracle, MS SQL Server, No SQL
Operating Systems:	UNIX, Windows

II Personal Details

Date of Birth:	22 nd June 1979
Languages Known:	English, German (A1)
Address:	502, Sapthagiri Homes, Bangalore
