Description:Human resources software is used by businesses to combine a number of necessary HR functions, such as storing employee data, managing payroll, recruitment, benefits administration, time and attendance, employee performance management, and tracking competency and training records.

Technologies used: ASP.NET VB / C#, SQLServer, Crystal Report, WCF, Web services, AJAX, JSON, ionic, Angular.

Project:Custom software

Type: Web Based Application, Android Application.

Responsibilities: Designing, Coding, Creating Database object.

Description:Customized software developed for Real estate, Education Industry,E Commerce.

Technologies used: ASP.NET VB / C#, SQLServer 2008,2014,2017, Crystal Report, WCF, Web services, AJAX, JSON, ionic.

➤ **Working at Vision Barcode Solutions as Software Developer** (June 2019- Feb 2021)

Job Profile: Currently working as a ASP.NET, MVC, cross platform xamarinDeveloper. Engaged in developing web based applications.

Project: Asset Tracking System

Type: Web Based Application,Android Application

Responsibilities: Designing, Coding, Creating Database object.

Description :The main objective of AMS is to keep tracking of different asset on different location.User can generate asset barcode labels, assign it to the customer or employee, do servicing or maintenance of old asset and also keep track of warranty period.AMS consist different types of reports i.e. Asset moving History Report, CheckinReport, CheckOut Report, Warranty Due Report, Location/Employee/Customer wise Asset Report,Non-moveable Asset Report, etc.User can also do asset tracking using Windows mobile application by scanning asset barcode.

Technologies used: ASP.NET C#, SQLServer 2008,2014 , Crystal Report, WCF, Web services, AJAX, JSON, xamarin.

Project:Warehouse Management System

Type: Web Based Application,Android Application

Responsibilities: Designing, Coding, Creating Database object.

Description :The objective of WMS is to generate barcode labels according to product inward (GRN) and maintain FIFO wise pick-list.According to pick-list, user will scan the barcode by Windows CE / Android device and issue it to the production department.After production, finish goods will scanned by Win CE/Android device and dispatch to the customer.WMS also consist different types of report i.e. Stock Report, Inward Report, Issue Report,Non-moveable Items Report, etc.User can also do stock auditing by scanning the barcode.

Technologies used: ASP.NET C#, SQLServer 2008,2014 , Crystal Report, WCF, Web services,AJAX, JSON,Xamarin.

Project:RFID Based Tracking System

Type:Windows Application

Responsibilities: Designing, Coding, Creating Database object.

Description :Radio-frequency identification uses electromagnetic fields to automatically identify and track tags attached to objects. In this project we are attaching RFID Tags on Each Carton When Carton passed through RFID Reader our application read All tag within a seconds without any human intervention and matches with Actual purchase order quantity. If Both quantities are matched, data automatically stored in database and allow to dispatch.

This application consist different types of report i.e. Daily Stock Report,Daily Inward Report, Daily Dispatch Report etc.

Technologies used: Winform, MS-Office, Sql Server 2014, Crystal Report.

➤ **Working at Indiora Solutions as Software Developer** (May 2018-May 2019)

Job Profile: Currently working as a ASP.NET,Mvc 5 Developer. Engaged in developing web based applications.

Project: CRM.

Type: Web Based Application

Responsibilities: Designing, Coding, Creating Database object.

Description :CRM help sales team in freight forwarding to manage their sales process.

Technologies used: ASP.NET C#, SQLServer 2008,2014 , Crystal Report, WCF, Web Services, AJAX, JSON, MVC 5, Web Api.

Project:Freight Forwarding software.

Type: Web Based Application

Responsibilities: Designing, Coding, Creating Database object.

Description: This Application is Provide the solution for Air Freight Import / export and Sea Freight Import / export.

Technologies used: ASP.NET C#, SQLServer 2008,2014, Crystal Report, WCF, Web Services,AJAX, JSON, MVC 5,Web Api.

- **Working at Paragon Information Technologies LLP as Software developer** (March 2016- Jan 2018)

Job Profile: Currently working as a ASP.NET Developer. Engaged in developing web based applications

Project: MYKYCBank

Type: Web Based Application (ASP.NET 4.0/C# 4.0)

Client: G&J KYC INFORMATION CENTRE

Description: Application MyKYCBank is a unique centralized KYC repository cum exchange platform for the gems and jewelry industry. All industry participants can update their own KYC information and documents at one place only and subsequently share the same with their trading partners.

Responsibilities: Designing, Coding, Creating Database object.
