Project Experience

Mind gate Solution Private Limited

Feb 2019 – September 2020

(Senior Business Analyst)

Roles and Responsibilities (Onshore/Offshore):

- ❖ As a Product Business Analyst for a Payment Channel Gateway (E-Collect), I am responsible for all the interactions with the client and the SMEs to understand the requirement and create the business end-to-end test scenarios as per the client requirement.
- ❖ Supported Host-Host(H2H)-Phase-1 and Phase 2 UAT phase from GiB- Bahrain interacting with all the stakeholders

H2H Payments: (Project 1)

- ❖ Have delivered Phase-1 of Host to Host (H2H) Product/Services for the banks and its corporate customers. The key objective being the corporate customers be able to do domestic and international payments initiated from their ERP for their employees (salaries), payments and beneficiary registration in a simple and secure approach through H2H systems. The objective of this product is to automate the uploading, validation & approval part of the process so that the corporate can export the payment file directly from the ERP (Enterprise Resource Planning) to the destination system like UBS, e-Banking, e-Collect etc.. Post file validation & approval performed at the middleware securely.
- ❖ Below are the SWIFT Payment Formats which were delivered as a part of Phase-1 H2H
 - MT-101
 - MT-103
 - PAIN V1
 - WPS-KSA(Wage Protection Systems-KSA)
 - WPS-UAE(Wage Protection Systems-UAE)
 - Bulk Pay
- ❖ As a part of Phase-2 , we are delivering the below file formats and additional tags in PAIN formats
 - MT900- Confirmation of Debit
 - MT910- Confirmation of Credit
 - PAIN V3 and PAIN V5 Invoice Tags
 - Signatory Verification for Bulk Pay Formats

EFTS – Electronic Fund Transfer (Project 2)

Electronic Bill Presentment and Payment (EBPP): is a service supported by the Electronic Fund Transfer System (EFTS), which was introduced by the Central Bank of Bahrain (CBB), which allows customers from inquiring about their telephone, electricity, or any other bill. Participant banks settlement is performed at the end of clearing session through the CBB RTGS service, where banks shall credit billers account within 45 minutes of successful settlement.

Invoice Matching & Reconciliation (Project 3)

Invoice Matching & Reconciliation (IMR) is a unified solution which helps corporate customers of bank to easily manage the collections and reconciliation services (Online and Offline).

This module will help the customer to upload their invoices which raised and expecting receipts of payment against this and subsequent update of Credit note or Debit note (if any). Reconciliation will happen based on the invoice amount uploaded and collection account statement with relevant mapping fields.
