PROJECT DETAILS

Project: Claros R&D
Role: Scrum Master
Methodologies: Agile - Scrum
Organization: Beckman Coulter
Duration: Nov-2018 - Current

Project Overview:

Claros Collect allows you to use your web enabled devices to manually enter data. It validates your data at the source of collection by triggering alerts when values are outside an expected range. Claros Collect eliminates the need for manual paper forms. Once data is entered, it is immediately available to everyone - reducing transcription errors and time spent waiting for data.

Roles and Responsibilities:

- Led 2 Agile Scrum teams dedicated to developing mobile sensor management.
- Managed core Agile ceremonies in team environments: Sprint Planning, Daily Stand-up, Sprint Review and Sprint Retrospectives.
- Coordinated with 20+ business stakeholders, product managers, and development and testing leads to prioritize deliverables.
- Evaluated and analyzed team risks, issues, and activity progress.
- Tracked sprint metrics and maintained dialogue with teams on performance, challenges, accountability, and recognition.
- Guided Agile principles and facilitation skills to ensure teams were working in an Agile mindset and utilizing Scrum practices.
- Supported 2 product owners with respect to grooming and maintaining product backlogs.
- Ensured all of Scrum activities were tracked, kept up-to-date and reported.
- Communicated clear expectations, managed team performance, and built high morale among team members.

Project: Accenture Performance Achievement
Role: Technical Scrum Master
Methodologies: Agile - Scrum
Organization: Accenture Pvt Ltd.
Duration: June-2017 – Nov-2018

Project Overview:

MyPerformace is a feedback sharing site only for Accenture Employees. A Web application which allows user to set their priority and based on the performance feedback will be provided by the leads.

Roles and Responsibilities:

- Ensured effective software delivery based upon defined agile values and principles.
- Ensured all the inter-team risks, impediments, and blockers were identified, communicated and resolved.
- Managed core Agile ceremonies in team environments: Sprint Planning, Daily Stand-up, Sprint Review and Sprint Retrospectives.
- Developed an interactive and responsive User interface using HTML5, CSS3, Angular4 and Bootstrap.
- Creating reusable UI components/ directives.
- Integrated user facing angular components with the server side using RESTful Web services.
- Creating web applications effectively while following the separation of concerns (SoC) principle using Angular to keep the code modular.
- Writing reusable, testable and efficient code.
- Used Git for Version Control.

Project: Briggs and Stratton
Role: Software developer
Methodologies: Agile - Scrum
Organization: Accenture Pvt Ltd.
Duration: Aug-2016 – June-2017

Used Technologies: Angular, JavaScript, HTML5, LESS, Bootstrap

Project Overview:

Briggs & Stratton is one of the world's largest manufacturers of air-cooled gasoline engines for primarily outdoor power equipment.

Roles and Responsibilities:

- Understanding the requirements before attending sprint planning sessions, providing an estimate during call, blockers if there can be any.
- Designing and developing responsive layouts using HTML5, CSS3 and Bootstrap.
- Much of the work on DOM manipulation and user input validation at page level using JavaScript.
- Working with the QA team to prioritize the defects, and to discuss on open defects.

Project: Coles
Role: Business Consultant
Organization: Accenture Pvt Ltd.
Duration: April-2015 – Aug-2016

Application Used:ORS(Oracle real time scheduler- a fully integrated, dynamic Scheduling solution that encompasses best-of-breed planning, scheduling, dispatch and mobile functionality. The highly configurable nature of ORS enables it to be deployed in a broad range of supply chain sectors

such as Home Delivery, Field Service and Facilities Management.)

Project Overview:

Coles is one of the largest supermarket in Australia.

Roles and Responsibilities:

- Extract the data from the database according to the business requirement.
- Create the reports from the raw data and analyze the reports to fulfil the requirements and to achieve the organizations goals.
- Provide thorough support and problem resolution.
- Generate daily and weekly sales report.
- Root out inefficiencies, incorrect procedure and detrimental practices to turn around falling customer base at all locations.
- Configuration of new online store in system.
- Fleet management for all the stores across Australia using tool called ORS.
- Implementation of holiday plan.
- Contribute to knowledge capital, new solutions or ~~services~~
