- Updating the test cases flow as per business requirement change and followup to update same in script.
- Reporting

Environment: Regression Tool, Transaction Generator, UFT, ALM, Vmware (client Environment)

July 2011 – September 2011

Company: Capgemini India Pvt.Ltd

Client : Discover Financial

Project : Titanium ORE

Role: Test Engineer

Project Description: Titanium ORE is debt management which is a mainframe based application to administer recovery portfolios. The intent to come up with a new GUI based recovery system is to minimize manual intervention and to make it more user-friendly. This will help in making the recovery process effective and scalable. Titanium ORE application provides real-time updates and automates various business functionalities which will reduce batch processing except when external systems are entailed. Utilization of this system through web interface assures data integrity and accuracy to vendors, thus eliminating data interchange problems

Company: Capgemini India Pvt.Ltd

Client : Discover Financial

Project : Regression Tool

Role: Test Engineer

May 2011 – June 2011

Description: Tool is the part of the PA tool suite which helps the users to build and maintain the regression test criteria's.

Company: Capgemini India Pvt.Ltd

Project : MCO Phase I

Role : Test Engineer

February 2011 – April 2011

DISCOVER

Description: This project enabled Discover acquisition and portfolio accounts to enroll into multiple concurrent promo offers. Internet Acquisition System is an application used for generating new consumer accounts with multiple non-overlapping promo offers. These offers are tested in ORION application. For portfolio consumers, only purchase promos had changes which are tested in ORION screens (APR and Fee Summary, APR Details, Promo Details).

Company: Capgemini India Pvt.Ltd

Project: TL-23

Role: Test Engineer

September 2010 – January 2011

DISCOVER

Project Description: With this project, Discover consumer accounts having good external status have changed from Term Level 22 to Term Level 23. This project changed the NSF and Late Fee structure for accounts moving to Term Level 23. New Payment Hierarchy structure implemented considering the Min Pay Due. We successfully tested all the scenarios of below fees.

- Late Fee
- BT NSF Fee
- Check NSF Fee
- Payment NSF Fee
- We thoroughly tested Payment Hierarchy structure for Discover consumer accounts as well as for Discover Business accounts.

FM System

Software Tester
