phone: +91-7483242595			
Total Experience	4.5 Years		
SKILLS	Relevant Exp.	Technical Score (1-10)	Projects
Java 8 ,Oops Concepts, Core Java, J2EE	4 Years	8	All Projects
Spring Boot, Spring MVC, Spring AOP, Micro Services , Rest API , Hibernate, Struts, Web Services [Soap, Rest]	3.5 Years	7	All Projects
Oracle, MYSQL,H2 database	3 years	5	All Projects
Tomcat, Web Sphere, Jboss	3 years	6	All Projects
HTML, Java Script	1 Year	5	All Projects
Putty, WinSCP, Git, SVN, JIRA ,Web Services, Linux, Agile , Maven, JUnit , Mockito	3 years	5	All Projects
ITIL Process-Service, Now , Change Request management, Incident management, Problem management ,Service Request handling , Process management	3	8	All Projects

Objective

- ✓ To achieve high carrier growth through a continuous learning process and keep myself dynamic, visionary, and competitive with the changing scenario of the world.

Profile Summary

- ✓ 4.5 years of strong experience in analysis, design, development and implementation of large scale, supporting mission critical Java/J2EE projects.
- ✓ Experience in development of web and enterprise application using j2EE technologies such as JSP, Servlets, and Spring Boot, spring MVC, Micro Services Hibernate, Web Services and JDBC.
- ✓ Ability to implement **Design Patterns (Strategy Design Pattern, Singleton, Abstract Factory Method design Pattern, Builder design pattern.**
- ✓ **Good knowledge on Linux File management, User management, access management shell commands.**
- ✓ Strong experience in different phases of Software Development Life Cycle (SDLC) including Design, Implementation and Testing during the development of software applications.
- ✓ Experience in logging of the application using Log4J Framework.
- ✓ Experience in using GUI/IDE tools of Eclipse and IBM Rational Application Developer (RAD).

- ✓ Basic Experience in working with Databases like Oracle, and MySQL.
- ✓ Experience in application servers like JBOSS, Apache Tomcat 6.0 Server.
- ✓ Good Experience in client communication and trouble shoot production issues using ITIL process.
- ✓ Excellent Communication, interpersonal and analytical skills and highly motivated team player with the ability to work independently.
- ✓ Ability to learn and adapt quickly to the emerging new technologies and paradigms.
- ✓ Proficient in Development and Deployment of Applications in Tomcat.
- ✓ Good communication, strong analytical and problem-solving skill.
- ✓ Able to effectively organize and prioritize multiple tasks.
- ✓ Ability to meet individual deadlines, team goals in a team and as an individual.
- ✓ Outstanding leader in projects and programs.
- ✓ Excellent in cost benefit analysis, policy planning and implementation.
- ✓ Proficient in risk assessment and impact analysis.
- ✓ Achieve a service-focused culture with emphasis on delivering on-time, high-quality products and services to internal and external customers.

Key Skills

- ✓ **Languages** : Java, J2EE,
- ✓ **Web Technologies** : Servlets, JSP
- ✓ **Database Connectivity** : Java Database Connectivity (JDBC).
- ✓ **Operating Systems** : Windows, Linux.
- ✓ **Frame works** : Spring Boot, Spring MVC, Hibernate, Mockito
- ✓ **Server Technology** : Tomcat, Web Sphere.
- ✓ **RDBMS** : Oracle, MySQL, H2 database
- ✓ **Internet Technologies** : HTML, XML, JavaScript
- ✓ **IDE/Tools** : Eclipse, Git, SVN, Service Now, JIRA
- ✓ **Testing** : Manual Testing, Junit ,Mackito
- ✓ **Server Tools** : Putty, WinSCP, Linux
- ✓ **Web Services** : Soap, Rest API

Education

MBA from Annamalai University,Chidhambaram

Work Experience

Software Engineer

Java Developer

PROJECT- 2

Title : Southwest Airlines
Web Browsers : Google Chrome, Mozilla Firefox, IE.
Environment : Java8, JSP, Spring Boot, Micro Services, spring cloud, RestAPI, Web Services
Role : Team Member

Description:-

- South West Airlines is a travelling domain which provides services in USA. South West Airlines is one of the biggest airline in USA.
- It operates scheduled domestic and international passenger services, as well as regional air taxi services..
- Here Reservation systems is subsidiary of Reservation product family. SWA applications categorized into different product families like customer service operations, Maintenance and engineering product family, Revenue Management, cybersecurity and network engineering teams etc...
- Here Reservation Systems provides booking and managing ticketing and boarding, baggage kind of airport related operations. As part of project requirement we are using Amadeus services which provides travelling domain third party web services.
- Altea Customer Management (CM) and Altea Reservation Desktop (ARD) are the main Amadeus applications which we are using for Airport operations and Reservation booking.

Responsibilities:

- ✓ Design, develop, and maintain client software in accordance with internal or external client specifications, following general programming practices and procedures.
- ✓ Design, implement and maintain java application phases.
- ✓ Recommend changes to improve established java application processes. Analyze and fully understand distributed system, development process, transaction flow, credit processing business, company structure, internal tools and related rules, regulations, guidelines, policies and procedures.
- ✓ Involved in creating Controllers with end points and respective service classes.
- ✓ Involved in ITIL operations as part of Application supporting
- ✓ Work with internal and external clients to define and capture user needs.
- ✓ Work with development team to define and implement architecture direction.
- ✓ Work within an agile development process to deliver quality solutions on a predictable schedule. Serve a leadership role within the team and company.

ROLE : Sr. Software Engineer

DURATION: 2 Years

PROJECT – 1

Experience and Project Details:

Title: Oman Airlines

Web Browsers : Google Chrome, Mozilla Firefox, IE.

Environment: Java, JSP, Hibernate, Spring MVC, , Tomcat Server, SQL,Rest API,Spring boot.

Role: Java Developer

Description:- • Oman Air Flight Status is a travelling domain which provides services to Oman Airlines. Oman Airlines is the national airline of Oman. It operates scheduled domestic and international passenger services, as well as regional air taxi services.

- Oman Air is a member of the Arab Air Carriers Organization. Oman Air Flight Status is one of the subsidiary of Oman Air.
- Here Oman Air Flight Status application categorized into different sub projects like ServiceByDesign, Redemption Upgrade, Flight Status Search and Manage Booking Controller system. Here ServiceByDesign provides booking and managing special meal and meals on board or before 24 hours of departure date
- ServiceByDesign mainly contains four modules like Flight Status, Flight Status bsl, Sabre Connector, Sabre client. As part of project requirement we are using Sabre Web Services from Sabre Services which provides travelling domain third party web services.
- Here we are converting SOAP response to Rest format as per project convenience and converted data we are using in our application.

Responsibilities:

- ✓ Involved in Application production support using ITIL process
- ✓ Design Development & Maintenance in Project
- ✓ Develop and execute Junit test plans using Mockito framework
- ✓ Involved in identifying the End-to-End Scenario and creating the Reusable methods
- ✓ Work with development team to define and implement architecture direction.
- ✓ Work within an agile development process to deliver quality solutions on a predictable schedule.
- ✓ Analyze and fully understand distributed system, development process, transaction flow, credit processing business, company structure, internal tools and related rules, regulations, guidelines, policies and procedures

Role : Product Support Engineer

Duration : 2.5 Years
