- Total 4 years of experience in IT including experience in SailPoint IIQ Analysis, Design, Development and Implementation of Identity and Access Management (IAM) technologies.
- Strong working knowledge of Identity and Access Management technologies – User Management, Password Management, Account Management, Entitlement Management, Role Management.
- Experience in SailPoint IIQ implementation and configuration for various application on-boarding's like Delimited File, JDBC, LDAP, Logical Application, Active directory.
- Developed various rules to customize SailPoint behavior like Build Map, Customization rule, Certification pre-delegation rule in access certifications, provisioning rules.
- Excellent knowledge and experience in implementing Workflows, Certifications, Reports and Roles.
- Worked in Life cycle Events Joiner, Leaver and Mover.
- Install, integrate and deploy the SailPoint Identity IQ in client environments.
- Good knowledge on Manager Correlation and Account Correlation.
- Worked on creation of Roles and Entitlements with other applications.
- Good knowledge on SailPoint IIQ, Role Based Access Control (RBAC), Governance and Access Certification in SailPoint.
- Working knowledge and handled the SailPoint upgrade in the downtime from 7.2p3 to 8.1p1.
- Configured Identity and Application Risk Score values.
- Experience in creating Quick links.
- Very good understanding of Provisioning, Governance, Life Cycle Management (LCM) and Compliance.

Experience Summary:

- Currently working as a **Consultant** in **L&T, Bangalore** from Feb 2021 to Till Now
- Worked at **TCS, Bangalore** as a **Software Engineer** from Aug 2017 to Jan 2021.

Certification:

- Blueprism Accreditation.

System Experience:

- **IAM Tool:** SailPoint IIQ 6.x, SailPoint 7.x, SailPoint 8.x

Robotic Process Automation:

- Blueprism ,Automation Anywhere

Hardware/Operating Systems:

- Windows, Linux

Ticketing Tool:

- ServiceNow

Middleware/Databases:

- SQL

Web Servers:

- Apache Tomcat 7.0

Testing :

- UAT, RPA Testing.

Markup Languages:

- HTML, CSS

Languages:

- Core Java,

Education:

- Bachelor's in Electrical and Electronics Engineering JNTUA, Anantapur.

Project :**Project: M&S Inventory****Client: Consolidated Edison****Environment: SailPoint IAM , Core JAVA , Apache Tomcat server, Connectors like AD , LDAP , JDBC ,Delimiter etc.****Description:**

- Consolidated Edison, Inc., commonly known as Con Edison or Con Ed, is one of the largest investor- owned energy companies in the United States. The company provides a wide range of energy-related products and services to its customers through its subsidiaries.
- Key Responsibilities:
- Configured Authoritative and Non-Authoritative Applications Configuration using Active Directory, Flat file, JDBC and LDAP
- Configuration of **Schemas, Filtering and Merging** in Application creation Process
- Onboarding the identities into SailPoint from different applications
- Configured Account Aggregation and Group Aggregation to aggregate data from different applications
- Configured Role and Entitlement SOD policy to meet the client Requirements
- Implemented **Birth Right Provisioning** by using Business and IT Roles
- Implemented **Before Provisioning Rule** to meet the business requirements
- Implemented **LCM** activities for Joiner, Leaver and Mover
- Developed custom **Build Map Rules, Correlation Rules** and Workflows as per the business needs
- Implemented **Certification Exclusion Rule** to excuse certification items from certification List
- Configured Multiple Certifications Like **Application owner, Manager Certification** to meet the business Requirements
- Implemented **Customization Rule** to identify the Uncorrelated accounts or Dormant accounts
- Provisioning users to various target systems as per the requirement by assigning IT and Business roles
- Implemented and Customized Workflows as per customer requirements
- Configured Identity and Application **Risk Score**

Project :

Project: Role Management

Client: TECO Energy

Environment: SailPoint IAM , Core JAVA , Apache Tomcat server ,MySQL, Windows 7.

- Installed, Configured, Designed and implemented SailPoint Identity IQ tool
- Configured **Authoritative** and **Non-Authoritative** Applications Configuration using Active Directory, Flat file, JDBC and LDAP
- Onboarded the identities into SailPoint from different applications
- Configured **Account Aggregation** and **Group Aggregation** to aggregate data from different applications
- Analyze the application before on boarding to get extract of application with the user unique ID, Access levels and permission and do deep dive sessions
- Participate in Proof of Concept effort as a SailPoint technical to demonstrate role-based user provisioning that leads to full-fledged implementation of IIQ
- Implemented LCM activities for Joiner, Leaver and Mover
- Created Multiple Correlation Rules to correlated the identities into SailPoint from different Applications
- Implemented **Certification Exclusion rule** is used to exclude specific items from a Certification based on an evaluation of the entity being certified
- Implemented **Certification Delegation Rule** to delegation the certification items to further level if application owner is inactive mode
- Implemented **Customization Rule** to meet the business Requirements
- Configured **Account Group Membership** and **Account Group Permissions Certification** to meet the business Requirements
- Collaborate with the team and architecture on new platforms, IAM roadmap; assess security risks, and identity long-term strategy recommendations

Project:

Client: AXA

Service Area: Technology

Role: Blue prism- Support

Tool: Blue prism

Description:

This process based on US Mortgage process. It involves four interfaces-EDMS Web portals, Elynx Web portal, Lakewood and MS Excel. Initially needs to Login with their credentials in each application and then follow entire process for each Loan number which needs to capture from Production Tracker (Excel). Tracker will be updated by Ops Team. It will capture one by one Loan Numbers and then move towards EDMS. We need to search for loan number and then needs to download the documents. After that needs find, or cross verify values with the Extracted data from documents then it needs to update on Lakewood application. If documents are not available in EDMS then we need to follow entire download process in Elynx. Finally, after processing each Loan checklist need to be update and provided to the Ops team and the status of each loan is updated in Production Tracker.

Key Responsibilities:

- Go through BRD which is given by Business Analyst
- Creating and executing workflows
- Assist and support implementation team members
- Developing application logic and run the flow of application
- Provided the estimation for Development and testing of process
- Perform unit tests and fix bugs
- To provide support to the processes once it goes into production

Technical Environment: Blueprism, MS Excel and MS Access, Outlook, EDMS, Elynx, Lakewood.
