RECENTLY COMPLETED PROJECTS-

- **Project:** BuiltE ERP: Jupiter Analytics

Technology: C#, SQL Server, SAP Crystal Report, VS 2017, Window 10, Jira, Git

Team Size/ Role: 9/ Project Lead

Description: BuiltE ERP is a cloud-based enterprise business management suite that automates sales, billing, fulfillment, distribution (including pick, pack and ship process), sales commission calculations, purchasing, payment processing, product receipts, inventory, warehouse management, asset management, core accounting, bank reconciliation, financial reporting, sales tax compliance and multi-currency support, including capability to print checks from the system.

Responsibilities:

1) Once we got the requirement from client we did work on project plan to deliver it on time with beta release.

Daily we are having scrum meeting with all the team members.

2) From scratch level with team member we designed model for the project in 45 days. Once we are ready with initial documentation and scope of work we start development.

3) We divided product backlogs in sprints and started working as per the plan.

4) Within 6 months of software development using agile development methodologies we are ready with beta version and we successfully delivered BuiltE ERP application.

5) Basically my role is to divide task and follow the deadline to complete sprint in time, and I also worked as a scrum master to solve the issues of team members.

6) To maintain the task schedules we used Jira.

7) To maintain the repository and versions we used Git.

- **Project:** Total Commerce Real-Ware US: MedRec Technologies

Technology: Asp.Net, .Net Core, WEB API, And C #, MVC Database: MS Sql Server 2014 Tools: Visual Studio 2017, RabbitMQ, DevExpress, Jira, Git, Microsoft Azure

Team Size/ Role: 6 / senior .Net Developer

Description: Enhancing ecommerce channel for ecommerce clients like delsey. Basically Total-Commerce is solution provider to ecommerce platform with backend software.

Responsibilities:

1) Implemented RabbitMQ to minimize the server load and especially to track action status.

2) Developed screens to add master data for applications.

3) We created API to post and get data from database.

4) Published Web API and Web Application with the help of Azure

- **Project:** APP Tutor UK: MedRec Technologies
Technology: Asp.Net, .Net Core, WEB API, C#, MVC Database: MS Sql Server 2014 Tools: Visual Studio 2017, Microsoft Azure
Team Size/Role: 4 / Senior .Net Developer
Description: AppTutor is a groundbreaking mobile platform application that allows parents and students to find the most suited tutor within their city and postal code with the help of advanced, user-friendly technology. AppTutor is guide for students and parents. This app is basically having business model like Uber. Student can choose tutor enter the subject with level and time schedule. After successful session tutor will get his respective charges.
Responsibilities:
 - 1) Database design as per client psd design for Admin Dashboard and Mobile Application.
 - 2) Implemented live database, admin dashboard and Web APIs.
 - 3) Implemented Web APIs to post and get data from database.
 - 4) Designed Admin Dashboard using c#, MVC, Java Script and Ajax.
 - 5) Implemented web APIs for mobile applications.
 - 6) Admin Dashboard and Web APIs.

 - **Project:** RPS Musika US: MedRec Technologies
Technology: WordPress, Stripe Payment Gateway, Dokan Multivendor Plugin, Tax Jar US Tax Calculation, PHP and Java Script
Team Size/Role: 2 / Senior Developer
Description: The Musika Marketplace gathers sellers and consumers together for a purpose beyond just commerce.
And that purpose is to invest in the lives of children because building a sustainable tomorrow starts with the young minds of today. Through our mindful commerce we can create lasting resources in our communities to Empower, Educate, and Equip our youth for a happier and healthier world!
Responsibilities:
 - 1) As per requirement we installed Woocommerce, Tax Jar, Dokan, Stripe etc. plugins.
 - 2) As per client requirement we configured the Woocommerce with stripe, Tax Jar and Dokan.
 - 3) As per the customization we did changes in Plugin PHP code.
 - 4) For tax calculation and checkout page customization we did changes using Java Script.
 - 5) Implemented stripe Dokan connectivity for Multivendor.

 - **Project Title:** PMS: Jupiter Analytics
Technology: Web API, .Net Core, MVC 5, JQuery, SQL Server 2014, Entity framework, Bootstrap HTML and CSS. Microsoft Azure
Team Size/ Role: 5/ Project Lead
-

Dnyaneshwar Suryawanshi
Senior .Net Developer
dnyaneshwar.y.s.30@gmail.com +91-907-581-2174

Description: PMS helps businesses manage simple and complex projects. It enables users to assign projects, track milestones and issues, collaborate with project team via chat, share documents, integrate with other applications, and monitor progress and billable hours.

Responsibilities:
