

Y.SASI KUMAR REDDY

Email: sasireddy396@gmail.com

Mobile: +91-8431208702

Summary:-

- Having 4+ years of Professional Experience in IT industry in development of various projects using **QlikView, QlikSense**.
- Skilled in Design, Development in QlikView applications.
- Developed QlikView Dashboards using Chart Box (Drill Down, Drill up & Cyclic Grouping), List, Input Field, Table Box and Calendar & Date Island.
- Manage daily Qlikview jobs that update QVD files and Dashboards.
- Connected to different **ODBC, OLE DB** data sources (SQL Server) and flat files to create and schedule different complex reports as per given business requirement by leveraging the basic components of QlikView.
- Experience in database programming, SQL, Tables, **Views, Indexes, Joins**, and **Sub - Queries**.
- Trained end users to develop and use **QlikView** and **QlikSense** applications
- Used section access for implementing object & data level security
- Created detailed design, development, testing & migration documents and performing **Proof of Concepts (POC)**.
- Implemented security and involved in deployment of qlikview applications
- Loaded Data into QlikView application from different QVDs, excel files, database and external files.
- Extensive experience in creating Pixel Perfect reports, Excel reports, Word reports, PowerPoint reports using NPrinting designer and automating the jobs in NPrinting Server
- Knowledge on Data Warehousing concepts like Star schema, Snowflake, Dimension and Fact Tables
- Willing to learn and adopt to new challenges, having excellent communication skills and strong interpersonal skills.
- Hands on experience in customizing the QlikView and NPrinting reports as per the business requirements.
- Understanding of data modeling, dimensional & relational concepts like Star-Schema Modeling, Snowflake Schema Modeling, Fact and Dimension tables; experience in Extract, Transform and Loading process of data.

Work Experience:

- Working as a Software Developer in **Mansoft Technologies Pvt Ltd, Bangalore** from May 2019 to till date.
- Worked as a Software Engineer in from **Zensar Technologies**, Bangalore, Aug 2017 to Apr 2019.

Technical Skills:

OLAP Tools : QlikView 10, 11 & Qlik Sense

Database : SQL Server.

Operating System : Windows XP.

Education:

Master of Business Administration from Vikrama Simhapuri University, Nellore in 2013.

Project#3

Client : TIGI Lenia Electronics Ltd, USA

Project Title : SIS (Sales Information System)

Role : Qlikview Developer

Description:

The main objective of this project is to design and developed in such a way to generate reports to understand the growth rate of Order, Sales and Inventory. It's also includes product wise analysis, geographical wise analysis and time based analysis; these are the key aspects of this project. A report generated by this warehouse helps the management to study and analysis the business status.

Responsibilities

- Involved in Extraction, Transformation and Loading data from different data sources.
- Creating Dashboard style of reports using Qlikview components.
- Created PixelPerfect reports, Excel reports, PowerPoint reports and Word Reports using NPrinting tool.
- Charts are used in making reports more user friendly in analysis purposes.
- Involved in Dashboard development and testing.
- Assist in testing and giving access to application after migration.
- Data modeling for Dashboard design.
- Used script functions in designing application development.
- Set analysis to provide custom functionality to application.
- Provide document level security for the application.
- Performance tuning to application.

Project#2

Project Name : Information on Demand

Client : Istore, California

Role : Qlikview Developer.

Description:

Information on Demand is an iStore maintained by Qlikview. This iStore provides different type of reports and dashboards to the Business People (End Users) on the basis of Buy and Subscribe. The main aim of this project was to develop and upload the CR Reports and dashboards in to Qlikview Server from where the end users can buy and analyze the Reports. The Reports developed in this project gives complete analysis on eBay marketing at different products like DESKTOPS, LAPTOPS, CDs, DVDs, and AUDIO DEVICES etc. By using these Reports the end user can analyze data at different levels like 'By age Group', 'By Gender' 'By Brand'.

Responsibilities

- Involved in Extraction, Transformation and Loading data from different data sources.
- Creating Dashboard style of reports using Qlikview components.
- Charts are used in making reports more user friendly in analysis purposes.
- Involved in Dashboard development and Unit testing.
- Assist in testing and giving access to application after migration.
- Data modeling for Dashboard design.

Project#1

Project Name : HPOM

Client : HP

Role : Qlikview Developer

Description:

Output management is the ability to administer and control the output devices and functions on managed systems. Add the word enterprise to the phrase, and the definition includes administration and control of output across all managed systems in the enterprise. Output management applications manage destinations of all kinds, from printers to faxes, e-mail, pagers, and the World Wide Web. The HP Output Server is the main component of the HP Output Server Product Suite. It provides is available for both UNIX and Windows platforms. The following products integrate with the HP Output Server and enhance its functionality and flexibility. These are some products: HP Web Delivery, HP Output Envoy

and Explorer, HP Output Distributor, Output server Manager, Job Manager, Smart Office Delivery, Remote and Confidential Printing.

Responsibilities:

- *Delivered advanced/complex reporting solutions such as Dashboards and Standardized Reporting using Qlikview.

- *Created Dashboards style of reports using QlikView components like Table Box, Text Object, Container Object, List Box, Slider, Buttons, Charts, and Bookmarks.

- *Strong understanding in creating Dashboards, scoreboards for the required KPI's in QlikView.

- *Developed load scripts to work with multiple data sources (SQL, Flat Files, Excel, and MS Access).

- *Implemented Security & involved in Deployment of QlikView Applications.

- *Executed the scripts and checked the incorporated script changes in the Application.

- *Analyzed the existing **QlikView data model**, script logics and the ETL business logic for the existing QlikView applications.

- *Improved the overall performance of the application and redesigned data model applying QlikView performance tuning techniques.
