- Worked as .Net Developer in Wipro Limited, from 2020 December – 2022 April
- Worked as .Net Developer in Halcyon Technologies Pvt. Ltd, from 2017 July – 2020 October.

Educational Qualification

- Bachelor of Technology in Computer Science Engineering, JNTU, India.

Technical Profile

Microsoft Technologies :	C #.NET, VB.NET, MVC, ADO.NET, EF, LINQ, Web API, ASP.NET CORE
Web Technologies :	HTML, CSS, Bootstrap, Materialize CSS, AJAX
Scripting Languages :	JavaScript, JQuery, Angular
Web Server :	IIS
Version Controls :	TFS, Git
Database :	MS-SQL Server 2014, 2016, 2019
Development Tool :	VisualStudio.NET 2015, 2017, 2019,2022
Cloud Technologies :	AWS

Project 1

Title	: IMS Direct
Client	: Thebigword
Team Size	6
Technologies	: ASP.NET MVSC, C#.NET, Entity Framework, WEB API, SQL Server, Angular

Description:

Interpretation Management System (IMS) application, process of booking interpretation service (Spoken translation – Spoken language of the customer to the target language) to the end customers. In IMS have four modules booking, offer, invoice and operational. To maintain user details we are maintaining profile micro service and to maintain files irrespective of application using file services.

Responsibilities:

- ❖ Developed Micro services Using Asp.net Core, C# and SQL Server.
- ❖ Responsible for requirement gathering and analysis.
- ❖ Worked on creating database and tables using entity framework core
- ❖ Using blob storage to store the files in azure.
- ❖ Using application insights to maintain logs.
- ❖ Implemented test cases.

Project 2

Title	:	PII
Domain	:	Auto Mobile
Role	:	Developer
Team Size	:	6
Environment	:	{ VS.NET 2019, .NET Core WEB API , SQL Server 2016 ,Angular 8 }

Description:

PII (Personally Identified Information) is a project for removing customer's personal information from the cars when the vehicles are bided or resaled . PII provides step by step instructions with proper information and images to how to remove customer's information from the vehicle like Navigation info, Bluetooth info, Phone book info and how reset Factory settings based on Year, Make and Model of the vehicle.

Responsibilities:

- ❖ Involved in daily scrum meetings on allocated module tasks with team.
- ❖ Design the Database skeleton architecture & integrated the UI screens as per mock up designs given.
- ❖ Created Angular services and integration with RESTful APIs. Used Angular HttpClient to send GET/POST request to fetch data from server.
- ❖ Unit Testing and Bug Fixing.
- ❖ Utilized Angular CLI commands to build and develop front-end functionalities.
- ❖ Makes design recommendations towards the development of new code or reuse of existing code.

Project 2

Title	:	MEO
Role	:	Developer
Client	:	Point Progress Ltd, UK
Team Size	:	3
Environment	:	{ ASP.NET, VB.NET, MS SQL SERVER 2016 }

Description:

MEO-Business allows you to control spending limits, capture receipts and process expense claims with ease. With the ability for your claimants to photograph receipts, read them with OCR, together with GPS mileage tracking, you can be sure that claims are complete and accurate. It will provide all reports necessary for any business. MEO provides mobile applications. as well for both android and IOS.

Responsibilities:

- ❖ Understanding the requirements & Enhancements specifications.
- ❖ Involved in weekly client meetings for given requirement clarifications & confirmations.
- ❖ Analyzing the requirement and updating the database design.
- ❖ Understand requirements and transform them into functional applications in line with business objectives.
- ❖ Ensure error-free code that adheres to best coding practices.
- ❖ Involved in Code reviews.
- ❖ Code commits and merging using git & deploying code.

Project 2

Product	:	Takeaway Genie
Role	:	Developer
Team Size	:	5
Technologies	:	ASP.NET MVC, C#.NET, Entity Framework,, SQL Server.

Description:

Takeaway Genie is an online ordering system provider. Takeaway Genie provides the website for restaurants and takeaways to get their orders online.
