Technical Skills:

Distributed Technologies	RESTful, Web API
Technical Architecture	ASP.NET Web forms, ASP.NET MVC, ASP.NET CORE
Design Pattern	Singleton and Factory Pattern
IDE	Microsoft Visual Studio 2012/2013/2015/2019 and Eclipse
Database	MS SQL Server 2012/2015/2019, MYSQL, MongoDB
Database Technologies	Entity Framework, LINQ, LINQ to objects, ADO.NET
Programming Language	SQL, C#, VB.NET, JavaScript, Typescript 4
UI Technologies	HTML5, Bootstrap 3.0/3.3, Typescript 4, CSS3, XML, jQuery, JSON, XML, React JS, REDUX
Web/Application Servers	Microsoft Internet Information Server (IIS) 7.0
Operating Systems	Windows 10/8/7
Version Control Tool	GitHub, Bitbucket, TFS
Cloud	Microsoft Azure
SDLC	Agile
Other	JIRA

Professional Experience:

Organization	Designation	From To
Evot Ai Technology	Technical Project Manager	1st March 2022 to till Now
BTC Software	Sr. Software Engineer	1st Nov 2020 to 31st Jan 2022
4th Quarter Technologies PVT. LTD.	Software Engineer	20 Oct 2016 31st Oct 2020

N.D. Microsystems Pvt. Ltd	Software Engineer	01 Dec 2013 To 26 Aug 2016

Projects Details:

1.

Client	OOrja Group
Project	KPB Project
Duration	1 March 2022 To till Now
Team Size	20
Role/Position	Technical Project Manager
Project Description	SAP B1 project
Technical Environment	SAP B1, SQL Server 2012
Responsibilities	● Managing an onshore team of 20 members with 2 teams assigned to the project. ● Providing estimates and refining it as part of an agile project. ● Responsible for deliverables. ● Helping the team with their architectural issue. ● Working on architecture.

2.

Client	BTC Software Limited
Project	BTC AP project
Duration	1 Nov 2020 To 1 Jan 2022
Team Size	10
Role/Position	Sr. Software Engineer
Project Description	These are web based banking and financial software
Technical Environment	Node Js, JSON, XML, React Js,TypeScript, .net Core2 , Resharper
Responsibilities	● Implementation of new requirements. ● Handling team of 10 people as senior lead with the technical issue and guidance for project ● Involved in sprint planning and estimation ● Worked with manager for design & development of the application

3.

Client	Paselo Solutions
Project	Medical App
Duration	1st Nov 2020 – 14th Feb 2021
Team Size	3
Role/Position	Sr. Software Engineer
Status	Completed
Project Description	Application for psychiatrists to consult with their patients on video calls and group sessions for patients.
Technical Environment	Node Js,, JSON, XML, React Js
Responsibilities	● Developed application with 2 team members. ● Involved in all phases of development of the application.

4.

Client	Baybridge Solutions

Project	Trifecta Hotel Management
Duration	1st Feb 2021 – 1st May 2021
Team Size	5
Role/Position	Sr. Software Engineer
Project Description	These are web based application to help client to book hotel and Reservation
Technical Environment	Node Js,, JSON, XML, React Js
Responsibilities	● Developed application with team . ● Involved in all phases of development of the application.

5.

Client	Goodyear Rubber Industries Bdn. Shd.
Project	Barcode and Weighing Bridge Application
Duration	13 Jun 2014 – 26 Mar 2015
Team Size	15
Role/Position	Software Engineer
Project Description	Goodyear Rubber Industries is a part of GIIB which produces raw materials and supplies to other rubber industries.
Technical Environment	C#.Net 4.0, Sql Server 2012.
Responsibilities	● Responsible for gathering the business information. ● Created window application for print barcode on labels and fetch weight. ● Responsible for improving the performance of the application running for thousands of records, and optimizing the code.

6.

Client	PMMP
Project	PMMP Application
Duration	22 Nov 2014-26 Mar 2015
Team Size	4
Role/Position	Software Engineer
Project Description	This Application was the combination of web and android app. By this application admin can view all blocks of palm which were tagged by laborers while wearing a special type of android watch.
Technical Environment	Java 7, JSP, apache tomcat 7, MySql 5, Android Jelly bean
Responsibilities	● Gather information about developing applications. ● Created Web part, Reporting. ● Responsible for improving the performance of the application.

7.

Client	India Rubber Industries
Project	Attendance Tracking System
Duration	12 Jul 2015 - 22 Sep 2015
Team Size	2
Role/Position	Software Engineer
Status	Completed
Project Description	This site has been designed to allow users to put their attendance online, get information of left leave and their deducted salary information based on their leave.
Technical Environment	NET 4.0, C#.NET, SQL Server 2012, Web Services, Java script, AJAX, HTML, CSS, JSON.
Responsibilities	● Responsible for gathering the business information. ● Created Web part, Write Web Services.

	● Responsible for improving the performance of the application running for thousands of records, and optimizing the code. ● Performed testing by writing unit tests for various inputs to check against the output for the modules, methods that were developed.
Achievements	SharePoint 2010.

8.

Client	Cerrebro
Project	Job Scheduling and Tracking System
Duration	24 Sep 2015 - 2 Jan 2016
Team Size	3
Role/Position	Software Engineer
Status	Completed
Project Description	This is a web and android application which helps sales executives to book a meeting schedule to a customer and their manager to track their locations.
Technical Environment	NET 4.0, C#.NET, SQL Server 2012, Team Foundation Server, Visual Studio.Net 2012, XML, Web Services, Java script, AJAX, HTML, CSS, JSON, Android jelly bean.
Responsibilities	● Created Web part, Web Service. ● Designed the whole Object Oriented (OOP's) structure for the application. ● Implemented JSON for transforming the context, and manipulating with the data. ● Performed testing by writing unit tests for various inputs to check against the output for the modules, methods that were developed.

9.

Client	PISEN
Project	Inventory Management and Billing System
Duration	3 Jan 2016 – 30 March 2016
Team Size	2
Role/Position	Software Engineer
Status	Running
Project Description	This is a web and android application which helps Outlet to do billing and warehouse admin to manage stock.
Technical Environment	NET 4.0, C#.NET, SQL Server 2012, Team Foundation Server, Visual Studio.Net 2012, XML, Web Services, Java script, AJAX, HTML, CSS, JSON, Android jelly bean.
Responsibilities	● Created Web part, Web Service. ● Designed the whole Object Oriented (OOP's) structure for the application. ● Implemented JSON for transforming the context, and manipulating with the data. ● Performed testing by writing unit tests for various inputs to check against the output for the modules, methods that were developed.

10.

Client	Haveli Restaurant and Resort
Project	Driver Registration
Duration	1 Apr 2016 – 26 Aug 2016
Team Size	2
Role/Position	Software Engineer
Status	Running
Project Description	This is a window application which helps an operator to register a driver and provide them a membership card.
Technical Environment	NET 4.0, C#.NET, SQL Server 2012, Visual Studio.Net 2012, JSON, WPF
Responsibilities	● Created Window application, Web Service. ● Designed the whole structure for the application.

	● Implemented JSON for transforming the context, and manipulating with the data.
	● Performed testing by writing unit tests for various inputs to check against the output for the modules, methods that were developed.

11.

Client	Multiple Construction Companies
Project	Presales, Postsales customized erp
Duration	25 sept 2017 – 31st Oct 2020
Team Size	15
Role/Position	Software Engineer
Status	Running
Project Description	These are web based applications to help clients to take leads and schedule meetings and follow ups.
Technical Environment	NET 4.0, C#.NET, SQL Server 2012, Visual Studio.Net 2012, JSON, XML, Jquery, Ajax
Responsibilities	● To get leads from Facebook and maintain it in our system.
	● Create pages and reports for clients.
	● Implemented JSON and XML for transforming the context, and manipulating with the data.

12.

Client	Banking and Private sectors
Project	Taxonomy
Duration	1st Nov 2020 – till now
Team Size	5
Role/Position	Sr. Software Engineer
Status	Running
Project Description	These are web based applications to help clients to take leads and schedule meetings and follow ups.
Technical Environment	NET 4.7, C#.NET, SQL Server 2012, Visual Studio.Net 2019, JSON, XML, React Js
Responsibilities	● Create pages and reports for clients.
	● Implemented JSON and XML for transforming the context, and manipulating with the data.

13.

Client	Indiag Rubber
Project	Online Test
Duration	1 st Dec 2013 28 th Feb 2014
Team Size	2
Role/Position	Lead Engineer
Status	Completed
Project Description	Indiag Rubber often used to take tests of his employees to review their performance, knowledge and skills. This web based application is divided in two parts. From one part an admin can put all question and answer together and on the second part employees give the test either in subjective or objective manner.
