Role	Developer, ODC QA inspector

Organization	Mahindra Satyam	
Duration	April/2010 — August 2014	
Team Size	**Project : ~60**	**Module : 6**

Project Description

Nestle is a well known FMCG company having its presence in almost all the corners of the world. He has been handling the development Change request & Work request for Nestle at MSAT offshore.

The project involves improving the performance and operational efficiency of the Nestlé businesses worldwide.

The GLOBE Support Structure is responsible for:
- Implementation planning
- Deployment support
- On-going application support
- On-going support following implementation.
- Excellent exposure in writing & reviewing functional specifications, Test scripts.
- Handle Daily Operational Meet, which deals with priority issue, leave management, KT session, Safety and Health
- Participate in Weekly/Monthly call with the client and finalize the KT process and improvement for subsequent week/month.
- Nestle Continuance Excellence (NCE) Pillar lead.
- Program debugging for root cause analysis of issue.

Worked at Nestle client Location in Vevey, Switzerland for 1 year

- Analysis and Estimates of functional specifications provided by the process team on Client side.
- Design, Development and testing.
- Handling Incidents.
- Creating test cases for technical Unit Testing.
- Co-ordinate with Offshore Team.
- Well versed in preparing functional and technical specification

Few Key responsibilities as a Nestle Continuance Excellence (NCE) Pillar lead

- Organizing Daily, Weekly and Monthly Operational Review(OR) with offshore team and Nestle Clients.
- Worked as facilitator for all meeting regarding.
- Prepare the Monthly review meet with top management to address and understand SWOT analysis, attrition ratio, and KPI graph.
- Has implemented one GSTD(Go, See, Think & DO), Nestle methodology to identify, address and analyze the improvement areas, that has reduced wrong assignment of ticket to team.
- Has worked with Client HR Top management in identifying the Nestle HR process Automation project.

Few Key developments as a developer

- Has developed a BDC programs to upload/change/delete data by calling standard transaction.

> For fulfilling the requirement, the BDC recording of the corresponding transaction was done. A flat file in which data is stored is read into internal table and fed into Database table using standard tcode. In CALL TRANSACTION Error Log file was created to keep track of the erroneous records.

- Has handled the ongoing application support for the process area.

  > Had to resolve all the incidents which affected the client business in production.

- Has created LSMW program for uploading Material/Vendors/Customer master data using Direct Input method & Batch Input method.

- Has created reports using Dialog programming that involves the use of Table controls and Tabstrip controls.

- Has done the Mass changes to the Material/Vendors/Customer data using MM17/XK99 & XD99 transaction respectively in Production & Pre-Production live servers.

- Has worked in OOPs ABAP for developing programs in ECC systems which had both the options of classical and ALV output using OOPS concept.

- Provided training in performance improvement in ABAP.

Contribution as a process-area member
- Developed new objects based on the functional specs coming from onsite.
- Involved in Development of Complex Reports, debugging to find out solutions for critical requirements.
- Interacted extensively with Development Coordinator, for clarification of Requirement details, test data, possible test cases for testing.
- Has done the quality assurance of the functional specs coming from onsite.
- Assign objects to fellow team members.
- Done the quality review of the developments delivered from offshore.
- Resolve critical issues assigned to the team.
- Act as a mentor to all the new members in the team.
- Has handled the ongoing application support for the process area.
  Had to resolve all the incidents which affected the client business in production.

Kudos
- Appreciation received from Onsite Development Co-ordinators Clients for the early & quality delivery of the developments assigned.
- Was a part of the Best Development team award awarded by Nestle for outstanding achievements, in term of technical realizations, behavior or team role.
- Was awarded PAT ON BACK award in recognition of the high levels of Performance in the project.
