EDUCATIONAL QUALIFICATION

Bachelor of Engineering from Hooghly Engineering & Technology College with 74%

PROFESSIONAL TRAINING

1. ISTQB Certification Training.
2. Selenium Training
3. QTP Training

DOMAIN EXPERTISE

Technical

Technology   : Java
Test Automation Tool   : Selenium
Defect Reporting Tool   : ALM 12.0
Database   : SQL Server

MAJOR ASSIGNMENTS:

Assignment-1	
Project:	EIQA
Client	Morgan Stanley
Technology:	Java
Role:	Manual and Automation Test Engineer
Automation Tool	Selenium

Brief description of the project: MFA-Multi Functional Authentication. This application tests the various features available on the login page of Matrix FBL .It allows the user to request more information, to know about the health status of the application, to get details of help desk specific to their country etc.

Matrix-FBL-Matrix FBL(Form based login) is a web application which provides Matrix Portal permission user(User with proper entitlements to the needed services and access to required groups) with a Login, Change password and Reset password screens both in Internal and External networks

Responsible For:

1. Created Test cases Using Element locators and Selenium Webdriver methods.
2. Execution of Selenium Test cases and Reporting defects.
3. Involved in Regression Testing using Selenium
4. Debugging Tests and Fixing errors
5. Understanding the test requirements and analyzing the application
6. Writing test cases
7. Test Execution
8. Involved in Retesting and Regression testing
9. Cross browser testing
10. Attending status call
11. Executing/Running Tests
12. Defect Reporting & Tracking
13. Test Reporting

Assignment-1	
Project:	Online Ordering Tool
Client	TELSTRA
Technology:	HTML, Java, Java Script
Role:	Test engineer

Brief description of the project: Online Ordering Tool is a secure way to order and manage many of Voice, Data & IP Products with Telstra. Online Ordering Tool is used to create order, check the status of current service requests, and view details of existing services. It will also allow to cancel, modify and create return for order s and order moves or changes for selected voice, Data & IP services.

Responsible For:

1. Understanding the client requirement and functionality of the system
2. Preparation and execution of test cases in Quality Centre.
3. Logging defect in Mingle
4. Interacting with the developers to make sure that they have understood the issues
5. Proactively involved in daily standup meeting.
6. Involved in Functional, Regression and System Testing
7. Retesting the Cases where defect has been raised.

8. Preparing test summary report
9. Preparing document for showcase.
10. Giving dry run and showcase to the client.
11. Giving KT to new joiners

Assignment-2	
Project:	IMPLUSE
Client	MEDSTAR
Technology:	Java
Role:	Project engineer

Brief description of the project: This is a Business to customer application that enables the business owner to monitor, control, maintain and enhance his business constantly and define new business rules as suite the situation. This application is very flexible in functionality and allows the business owner to redefine business strategies at the same rate at which the business changes. It offers an opportunity for the business owner to include new schemes, offers, discounts apart from multiple options and related products to be marketed to suit the needs of the customers.
