PROJECT SUMMARY

Project   : Online Grocery Delivery System (B2C)

Web URL   : https://btbasket.com (Continue in Development Phase)

Role   : Self Owner/Founder / Senior Member / Project Planner

Front-end   : HTML5, Bootstrap, CSS3, Jquery

Backend   : Asp.Net 2017

Database   : Sql Server 2012

Scripting Language   : Jquery, Ajax

Responsibility: Involving in business making decisions and doing market survey and also helping out team members in their issue in application's technical part. Currently we are in the last phase of our development and we now basically focus on SEO of the application and working together for its multi-language to meet end-user's need.

PREVIOUSLY DEVELOPED PROJECTS:

1. Project   : ERP Development for a Central Govt Organization

Role   : Technical member staff

Front-end   : HTML5, Bootstrap, CSS3

Backend   : ASP.NET MVC 6, Entity Framework6, Web API 2.0

Database   : Sql Server 2012

Scripting Language   : Jquery

Responsibility: Gathering SRS from client on a regular interval as per the need of the project and Creating data model & DFD for the entire module of Admin & Finance &   HR and, Writing backend Logic for the major module of the project Using Web API2.0 & Entity Framework and guide other team member on their work. Also involve in client meeting and present the module wise work to the client.

2.   ERP Saipem India (For TCS)

Role   : Senior Developer

Front-end   : HTML5, Bootstrap, CSS3

Backend   : ASP.NET MVC 6, Entity Framework6, Web API 2.0

Database   : Sql Server 2012

Responsibility: Writing Logic for HR modules which include leave policy and travel policy etc. for client using Web Api 2.0.Help team members in writing page optimized code for fast processing of

the application. Also involve in maintenance of the code and modification of the code as per the clients need.

3. Server Maintenance Activity Portal (PIX NIC)

Role & Responsibility: Writing backend Logic for creating an environment where every server details to be recorded with the application name and database mentioned. The detail of the server is maintained in this application for whole data Centre. Also we maintain a log table for every server when it failed or replaced from time to time.

4. IP Tracking System (Intranet Software -NIC)

Role & Responsibility: Writing backend Logic for creating a module where each user of the organization is assigned with a unique IP address with vlan number. Every ip address is maintained in this application with details of free IP to be assigned in future.SHQ and DHQ list also maintained over here to ease use of the application.

5. Employee Profile Management Software (Intranet Software -NIC)

6. Employee SHQ Attendance System Management (Intranet Software - NIC)

Role & Responsibility: Writing backend Logic for creating a module where each user of the organization is assigned with check in and check out time. if user came office late then when login to system a mail will go to the respective reporting authority for approval of the attendance. After Approval the system mark the attendance as present else it will record as absent. User also applies for leave in this system. Upon submission a request will go to the approver and so on.
User also able to get the report of total leave balance and attendance details on the end of the month.
