PROJECT DETAILS:

Project Title   :   **Field Service**
Position   :   **Salesforce Developer**
Duration   :   **Dec 2020-Till Date.**
Description

Field service is a massive and growing industry, powered by companies that make machines and equipment we use every day—in our homes, at our offices, in hospitals and just about everywhere. And all of these machines need to be fixed, maintained and sometimes replaced. That's where Canopus comes in. We make software that makes field service smarter, more efficient and more profitable than you can imagine. Our software lives in the cloud and connects field technicians, companies and customers to provide a simple, yet powerful way to manage all aspects of delivering world-class service experiences. Canopus is rethinking field service, and delivering cutting edge technology to help companies perfect service delivery, drive revenue and growth, and delight customers along the way.

Solution Environment: Sales Force CRM

Roles &Responsibilities:

- Configure out of box Salesforce , SalesCloud functionality.
- Design and setup Roles,profiles,users to let users use the CRM application.

- Created modern Enterprise Lightning Apps combining Lightning Design System, Lightning App Builder and Lightning Component features.
- Design and develop visualforce page to let management perform forecasting.
- Develop apex classes and visualforce page to search opportunities with advanced filtered conditions.
- Develop batch class to run every quarter to remove million sof archived records from system.
- Design and develop trigger to automate business processes.
- Design and setup two way integration between Salesforce and JSST to create and update opportunities.
- Migrate the developed components from Dev org to User Acceptance Testing org and upon successful validation move them to production.
- Load data from JSST system to Salesforce using Dataloader and Dataloader IO.

Project   : Waste Management
Duration   : May 2019 - Nov 2020.
Role   : Developer
RSI provide non-hazardous solid waste and recycling services for commercial, industrial, municipal and residential customers. It is the second largest provider of services in the domestic non-hazardous solid waste industry, as measured by revenue as well as a Fortune 500 company, publicly traded on the New York Stock Exchange (NYSE: RSG).

Following are the key responsibilities that I have handled in this implementation:

- Worked on field level security, profile level and validation rules.
- Involved in creating the custom objects, tabs, fields, formulas
- Developed application using Apex Controller, Visual Force pages.
- Worked on workflow rules and Approval Process.
- Involved in writing the triggers and apex class.
- Worked Permission Sets and assigning them to users.
- Worked on test classes.
- Worked on the configuration attributes and rules, commerce attributes, actions, steps   and transitions, layout, commerce libraries etc(Big machines).

Client   : ACT - Graduate School of Business

Duration   : Feb 2019 – Mar 2020.

Role   : Team Member

Roles and Responsibilities:

- Worked on various Salesforce.com customizations - standard objects and creation of customized business objects, screens, views.
- Defined lookup and master-detail relationships on the objects to establish connectivity among objects.
- Customized different page layouts and assigned them for different profile users.

- Customized tabs for among different business users groups and centers.
- Created various reports and dashboards.
- Imported data by mapping to business objects in CRM system using Apex data loader and Import/Export wizard
- Designed and deployed Apex Classes/Triggers for various functional needs in the application.
- Also defined VF pages for some functional requirements.
