OBJECTIVE

Strong willed and result oriented testing professional. Quick learner, team player and ambitious. Flexible to align individual traits to organizational requirements. Customer centric and focused on quality assurance.

SKILL&EXPERIENCE SUMMARY

- Around seven years of experience as a Senior Test Engineer.
- Good awareness of software development lifecycle (SDLC).
- Well acquainted with software testing lifecycle (STLC).
- Acquired domain knowledge in e-commerce, CAD and edtech domains.
- Worked in an Agile environment/team focusing on sprint-by-sprint deliveries
- Adept at functional testing on all components of an application and attention to detail.
- Hands on experience in API testing & Postman.
- Proficient in writing Test cases and Test Execution process good observation and judgement skills to determine priority and severity of software bugs.
- Provided guidance and Supervision to junior testers.

TECHNICAL SKILL

 Functional testing, API Testing, Postman, Selenium, Robot Framework & JIRA

PROJECTS

Project: LDD
Company: Cigniti
Role: Senior test engineer

Description: LDD is a CAD software used by the designers to build digital models. This software helps the designers to actually build & modify digital models.

Contribution :

- Performed functional testing and authoring test cases.
- Executing Regression test suite on new release candidate.
- Raising defects & retesting the defects in Jira.
- Exploratory testing on a RC and in production.
- Provided guidance and helped the team to deliver
- Reporting to the clients and preparing MSR.

Project: LEW

Description: LEW is a one stop destination for all the STEM products. User can log into the website to buy products, download resources, software downloads and receive latest news and updates

Contribution:

- Understanding the Requirements and performed requirements ambiguity
- Performed functional, UI and regression test case execution.
- Raising defects and retesting the defects in Jira.
- Exploratory testing on new builds in QA and live environments.
- Participated in feedback sessions on build quality and feature improvements

Project: WeDo

Description: WeDo : WeDo software provides an excellent platform to develop STEM skills in students. The whole concept of wedo is to make learning stem in fun & interactive way.

Contribution :

- Performed Smoke Tests on multiple OS & devices.
- Performed beta monitoring tests
- Exploratory testing on multiple OS & Devices.
- Raising defects and defect retesting.

Project: Risk

Company: Global Logic
Role: Senior Analyst
Description: This project deals with development of tools which are used to fight payment fraud. The main objective of this project is to protect genuine buyers and to give safe and hassle-free buying experience.

Contribution:
- Understanding the requirements of client.
- Test case authoring and execution.
- Involved in Smoke and Regression Testing.
- Defect identification and follow ups with development team.
- Involved in usability testing.

Project : FootPrint

Company: Serco
Role: Analyst
Description: Worked on a project called "FOOTPRINT" which is a geo engineering project. This project deals with data of any business to fetch on maps for the end user.

Contribution:
- Writing and executing Test Cases.
- Bug reporting.

QUALIFICATION

Bachelor of Technology in **Automobile Engineering** in 2011 from JNTUH

HOBBIES & INTERESTS

- Reading
- Music
- Fitness
